HAEMATOLOGY

Test Done	Result	Unit	Normal Value
HAEMOGLOBIN (Hb)			
<i>Sample: 603A.F2</i>			
HAEMOGLOBIN	↓ 8.5	g/dl	13.5 - 17.5

HAEMOGLOBIN
Photometric Measurement

Clinical Significance:
Hemoglobin is the iron containing protein found in all red blood cells (RBCs) that gives the cells their characteristic red color. Hemoglobin enables RBCs to bind to oxygen in the lungs and carry it to tissues and organs throughout the body. It also helps transport a small portion of carbon dioxide, a product of cell metabolism, from tissues and organs to the lungs, where it is exhaled.
