

# Bio Lab Centre

जांच घर

A Fully Computerised Lab

Gali no. 2, Near Modi Pharma,  
Pani Tanki Road, Nawabganj,  
Hazaribagh (Jharkhand)

9229070855 7004392036

Timing : 7 am to 7 pm &  
Sunday 7 am to 1 pm

Name : Mr. BALDEV RAM  
Age / Sex : 46-Years Male  
Report No. : DRP/BIO/24-25/698  
Referring Doctor : Dr. S.B.M.C.H  
Investigation : HIV, HCV, HBsAg, CBC

Billing Date : 02-Jul-2024

Sample Received : 02-Jul-2024

Report Released : 02-Jul-2024

## HAEMATOLOGY

### TEST DESCRIPTION

Sample:- BLOOD

Complete Blood Count, Edta Whole Blood/smear

Hemoglobin

Total Leucocyte Count

Method: Cell Counter

Differential Leucocyte Count (DLC)

Neutrophils

Lymphocytes

Eosinophils

Monocytes

Basophils

Method: Cell Counter

Absolute Neutrophils

Absolute Lymphocytes

Absolute Eosinophils

Absolute Monocytes

Platelet Counts(Coral Council -21)

Method: Cell Counter

RBC Count

Hematocrit (PCV)

Mean Corpuscular Volume (MCV)

Mean Cell HB (MCH)

Mean Cell Hb Concentration(MCHC)

RDW-CV

RDW-SD

Mean Platelet Volume (MPV)

Technology Used : Fully automated Hematology analyzers.

Remark: - A platelet count is a diagnostic test that determines the number of platelets blood. platelets, which are also called thrombocytes, are small disk-shaped blood cell produced in the bone marrow and involved in the process of blood clotting. There are normally between 150,000-450,000 platelets in each microliter of blood. Low platelet counts or abnormally shaped platelets are associated with bleeding disorders. High platelet counts sometimes indicate disorders of the bone marrow.
